Whiting-Turner Contracting Project Team

Re: Childs Landscape's Execution of Irrigation Work at IO Piazza

I am writing this letter to advise that Childs Landscaping successfully completed the irrigation work designed by Hydro-Logix Solutions for the IO Piazza Building in Arlington, Virginia.

Although the initial installation was not totally correct, upon notification and presentation of the irrigation punchlist, Childs Landscaping immediately corrected all the work within their scope. The Owner did accept the work, released Childs contract retention and has obtained their bond release from Arlington County zoning department.

Childs Landscaping is a very qualified landscaping and irrigation contractor that has worked successfully with Bovis Lend Lease for years. Additionally, their experienced plant managers and estimators have been of great assistance to our client when landscape design revisions are requested.

It is a pleasure for us to work with them.

If you have any questions, please don't hesitate to contact me.

Sincerely,

Bovis Lend Lease, Inc.
